NS Equine Therapies

FES and Laser Therapy

Non-Invasive treatment options to keep your horses feeling their BEST!

Functional Electrical Stimulation (FES) uses an electrical signal that mimics the body's own motor neuron function to produce a "functional" muscle contraction and relaxation. Backed by research and recommended by top sport horse veterinarians.

Benefits include but are not limited to:

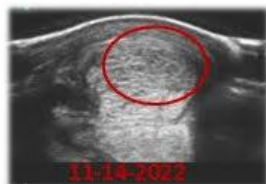

- Re-educates muscle memory
- Increases rehabilitation success rate
- Improves muscle function, strength, mobility and symmetry
- Reduces muscle atrophy and spasms
- Performance Enhancing and can be done in the comfort of their stall

The **Class IV Smart RLT Laser** and **Centurion Tesla 21+ Laser Shower (FEI legal)** are the most advanced regenerative and cold laser therapies available to horses. They use a non-invasive light to infiltrate deep into the tissue to quickly regenerate tissue, realign fibers, reduce scar tissue and provide additional comfort.

Laser type customized based on your horses needs.

- Muscles/Body Soreness
- Tendons, Ligaments (see pictures)
- Wound healing
- Reduces inflammation
- Pre/post performance pain relief and recovery
